

DAX Cheat Sheet for Junior Data Analysts

1. Basic Aggregations

Total Sales = SUM('sales'[Amount])
Total Profit = SUM('sales'[Profit])
Average Price = AVERAGE('products'[Price])

2. IF Logic (Conditions)

High Sales Flag =
IF([Total Sales] > 500000, "High", "Low")

3. Percentage & Ratios

Profit Margin =
DIVIDE([Total Profit], [Total Sales], 0)

Sales Growth % =
DIVIDE([Current Month Sales] - [Previous Month Sales], [Previous Month Sales], 0)

4. Time Intelligence

Previous Month Sales =
CALCULATE([Total Sales], PREVIOUSMONTH('Date'[Date]))

Last Year Sales =
CALCULATE([Total Sales], SAMEPERIODLASTYEAR('Date'[Date]))

Year-to-Date Sales =
TOTALYTD([Total Sales], 'Date'[Date])

5. CALCULATE (Power Formula)

Sales for Region A =
CALCULATE([Total Sales], 'geo'[Region] = "East")

High Margin Products Sales =
CALCULATE([Total Sales], 'products'[Profit Margin] > 0.3)

6. FILTER & VALUES

Top Product Sales =
CALCULATE([Total Sales],

DAX Cheat Sheet for Junior Data Analysts

```
FILTER('products', 'products'[Category] = "Chocolates"))
```

```
Total Products =  
COUNTROWS(VALUES('products'[Product]))
```

7. Ranking

```
Product Rank =  
RANKX(ALL('products'), [Total Sales], , DESC)
```
